

React Native Syllabus

1. Introduction to React Native

- What is React Native?
- Differences between React Native, ReactJS, and Native Development
- Setting up the development environment (Expo vs. React Native CLI)
- Running your first app (iOS & Android)

2. JavaScript & React Basics (Recap)

- ES6+ Features (Arrow functions, Destructuring, Spread Operator, etc.)
- React Fundamentals (Components, Props, State, Hooks)
- JSX Syntax
- Handling Events

3. Core React Native Components

- View, Text, Image, ScrollView, FlatList, SectionList
- Buttons (Button, TouchableOpacity, TouchableHighlight)
- TextInput, Keyboard Handling
- StyleSheet & Layout (Flexbox)

4. Navigation in React Native

- React Navigation (Stack, Tab, Drawer Navigators)
- Navigation Props & Passing Data

5. State Management

- useState, useEffect, useContext

6. Handling APIs & Networking

- Fetch API & Axios
- REST API Integration
- Error Handling & Loading States

7. Styling & UI Libraries

- Custom Styling (StyleSheet, Dynamic Styles)
- Responsive Design (Dimensions API)

- Popular UI Libraries:
 - React Native Paper
 - Material UI

10. Debugging & Performance Optimization

- Debugging Tools (React DevTools, Flipper)
- Performance Tips (Memoization, useCallback, useMemo)
- Reducing Re-renders

14. Project Work

- Build basic Project:
 - Fashion store app with dummy api
-
